ABOUT

Software Developer and Open Source Contributor with experience building full-stack applications, AI-powered solutions, and scalable web platforms. Contributed to Google open-source projects and passionate about solving real-world problems through technology.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C++, SQL, HTML5/CSS3

Frameworks & Libraries: React, Node.js, Express, Django, Flask, PyTorch, OpenCV, Tailwind CSS

Developer Tools & Databases: Git, GitHub, Linux, Docker, AWS, MongoDB

PROJECTS

CrediShield  | *React, FastAPI, PostgreSQL, Neon*

- Developed an AI loan risk assessment platform to help bank professionals evaluate applications and calculate risk metrics.
- Built document verification utilizing Tesseract OCR and fuzzy matching to classify ID cards (Aadhaar, PAN) and detect fraud.
- Designed a React/Vite interface and FastAPI backend to compute loan risk analytics in real-time.

Startora Platform  | *React, Tailwind CSS, Node.js*

- Developed a startup launchpad platform featuring founder profiles, project discovery, and student collaboration tools.
- Integrated a React/Tailwind frontend with Node.js/Express backend to manage user profiles and project databases.
- Optimized application state management and API routes to reduce page load times and improve navigation.

EdgeVision ANPR  | *Python, OpenCV, PyTorch*

- Designed an edge-optimized ANPR vehicle intelligence system using lightweight convolutional neural network models.
- Leveraged OpenCV and PyTorch to process video streams for real-time thresholding, contour detection, and character segmentation.
- Optimized model weights and inference parameters to enable efficient local processing on edge devices.

Phishing Detection  | *Python, Flask, Streamlit*

- Built a real-time phishing detection system trained on 5k+ URLs achieving 92% classification accuracy.
- Engineered preprocessing scripts to extract lexical, host-based, and content features from target URLs.
- Developed an interactive Streamlit dashboard and Flask API to serve real-time predictions and flag threats.

ACHIEVEMENTS

Hosted Linux Fest | *Member of FOSS BU*

- Co-organized and hosted Linux Fest at Bennett University, driving student outreach and managing event logistics.

Finalist, Deep Sight AI Challenge | *Team Monobyte*

- Developed deep learning models for high-accuracy real-time video detection and analytics to reach finals.

Smart BU Hackathon | *Team Hashiras*

- In Smart BU Hackathon, my team Hashiras secured 57 rank across 600+ teams in the university.

GitHub Badges | *Pull Shark, YOLO, Quickdraw*

- Earned official GitHub profile badges for active pull request contributions and prompt issue resolution.

OPEN SOURCE

Google ClusterFuzz  | *C++, Python, Go*

- Contributed critical security fix: resolved vulnerability in issue redirector by enforcing access control with `check_access_and_get_testcase`.

Google JAX  | *Python, JIT, C++*

- Resolved JIT compilation cache false hits on closed-over leaked tracers to improve cache accuracy and stability.

Ponytail  | *JavaScript, Node.js*

- PR Merged: Resolved cross-version test failures (Node.js < 20.11.0) by updating module resolution using the new URL class.

Dog API Images  | *Node.js, Scripting*

- PR Merged: Sanitized database breed directories by validating image formats, fixing sizes, and removing non-image files.

CERTIFICATIONS

Operating Systems and You: Becoming a Power User | *Google (Coursera)*

The Bits and Bytes of Computer Networking | *Google (Coursera)*

Introduction to Cybersecurity Tools & Cyberattacks | *IBM (Coursera)*

AWS Cloud Practitioner Essentials | *Amazon Web Services (In Progress)*

EDUCATION

Bennett University

Bachelor of Technology in Computer Science (CGPA: 9.13)

Greater Noida, UP

2024 – 2028

Guru Harkrishan Public School

CBSE Grade XII: 95.6% | CBSE Grade X: 94.0%

Karnal, Haryana

2008 – 2024
